

Home Safety Assessments

Helping older adults maximize safety and independence

At Bayshore Therapy & Rehab, we believe that older adults can stay at home with the right strategies in place. Our Home Safety Assessment can help you proactively evaluate the safety of your home, and make changes and recommendations as needed, to help you live independently – and safely – in your own home, for as long as possible.

An important preventative safety measure

Completed by an occupational therapist, Bayshore's Home Safety Assessment includes:

- ~ Assessing your home to address safety issues and recommend home modifications
- ~ Identifying risks that may cause a fall and recommendations to prevent falls
- ~ Recommending equipment and exercise programs to increase or maintain strength, mobility and balance

We will also help determine eligibility for funding support from federal and provincial programs, as well as extended health care programs. Tax deductions may be available for equipment and medical services.

Home Safety Assessments cost \$250 for the initial visit and \$120/hour plus travel if additional visits are required.

Support is just a phone call away.
