

Your health care information in one place

Bayshore HealthCare is proud to partner with Dot Health, to help you request, collect and manage your health info all in one place.

Available as an app, Dot Health stores health information your doctor or health care institution has on file including:

- doctor's notes
- blood work
- operative reports
- immunization records
- emergency records
- diagnostic imaging reports

With Dot Health you can also take notes during a doctor's appointment, ask the Dot Health physician what your records mean and share your records with loved ones or health care providers.

Your vital personal health information exists and Dot Health puts it one place.

A medical record contains all of your medical information that a health care institution or provider has on file from the most recent 5 years. One medical record could contain your medical history, blood work, prescriptions, diagnostic test results, immunization records and referrals.

Each record request costs \$34.99 + tax. With each request, you receive the following Dot Health services:

- Total management of your request
- Up to 5 years of your health records
- Accessible, digitized labs
- Searchable, and easy to navigate records

Special Offer

Win a \$100 VISA gift card.* Use promo code **DOTBAYSHORE** when you sign up.

*Promo code is only available until March 31, 2020. Only medical records from a Canadian health care provider can be collected. Dot Health is not available in Quebec. Dot Health encrypts all data; including Personal Health Information collected used AES 256-bit encryption, and complies with all applicable provincial and federal privacy laws.
