

Having been a family caregiver, I understand how overwhelming it can be when sourcing a care provider, and trying to find that balance between finding quality care that is affordable, while at the same time ensuring our loved ones, as well as our own, holistic needs are met. Our admin team is comprised of individuals who have either cared for a family member themselves, or who have experience in the PSW or Nursing fields. We understand and appreciate the uniqueness of each client and family situation; there is no one size fits all approach. We pride ourselves on our ability to offer carefully thought out Care Plans that meet the needs of our diverse clientele. From companionship, to nursing, to end of life support, our dynamic team is available to meet your immediate care needs as well as plan for future. Welcome to Bayshore Home Health.

Gennifer Doucette, Area Director

The journey into homecare usually starts after a traumatic event. Often families are not sure where to start and the choices can be overwhelming. I have been with Bayshore since 2016 and I have seen and heard it all. I have assisted clients as young as 6 weeks old with nursing support, adults with sudden serious injuries, elderly with dementia, and supported families with end of life care. I work closely with local community partners and various funders to ensure the best possible goals and outcome for my clients. I coordinate initial services and support my clients throughout their journey with Bayshore. If you would like to discuss care options for you or your loved one you can reach out to me at directly at 289-356-3130 or [durham@bayshore.ca](mailto:durham@bayshore.ca).

Jackie Hussein, Care Manager

As Managers of Clinical Practice, we provide clinical support and oversight to both clients and staff. Clients can feel confident in knowing that their care needs are met through ongoing observation and assessment. Staff, while working in the home with the client, know that they can contact us at any time if they have concerns about a client and we will provide clinical expertise on the matter – safety of staff and clients is top priority. In addition to supporting our clients and staff, we work closely with our local community service providers. We are also available to assist with N95 Mask fittings, skill validation, and support with PPE. We look forward to assisting you!

Ashley Ledger, Manager Clinical Practice  
Rebecca Gardiner, Manager Clinical Practice
